Simul8

CAREERS

Product Developer

◯ Hybrid remote, Glasgow

£ Competitive salary

This role is an exciting opportunity to join our team of product developers who improve and maintain both our simulation product, Simul8, and our online applications. You'll play a leading role in shaping our products to utilise emerging data science technologies. You'll also work closely with our wide range of customers to improve their everyday usage of the product.

"Being part of the Product Development team at Simul8 gives you the opportunity to contribute to every stage of the product development cycle. There's always something new and exciting in the works, and the team are consciously working to improve our users' experience, every way they can."

Meredith Gallop, Product Developer

Who are we? What do we do?

Being a B2B company, you might not have heard of us before. But if you think of any brand in the world, they probably use our software. We've helped the likes of Nike, Ford, Apple, the NHS and so many other organizations to transform the way they make decisions. It's not just about helping corporates increase their profit though. Every day, our users make a real difference. During the pandemic they have planned emergency overflow hospitals, launched effective drive through testing facilities and supported the vaccine roll out. There has never been a more critical time to help our users to make agile, informed decisions.

What will your first few months with us look like?

Your initial assignments will be centred around understanding our products, our code base and how our users implement solutions with Simul8. We will achieve this through a series of code projects, training modules and secondments to other teams.

You will be hands-on with the code base immediately with a goal of delivering your first improvement by the end of your onboarding period.

Your role and responsibilities

- Develop and improve existing software features.
- Collaborate with our users and internal experts to explore roadmap items through user stories and wireframing.
- Peer review code for other members of the team.
- Diagnose and solve problems experienced by our users.
- Use agile methodologies to plan and manage your workload.
- Manage and implement Azure CI/CD and AWS tech to deploy our products.

Does this sound like you?

- A tenacious self-starter who is full of initiative and ideas to drive the development of our product forward.
- A user driven attitude to development.
- An exceptional communicator who will be comfortable engaging with customers.
- Curious about technology, proactive with a passion for process improvement.

What we offer

We are a vibrant and innovative company with interaction between all parts of the business allowing our employees to grow their skills and gain exposure to all aspects of a company. There is scope for rapid personal development and progression, with the enviable potential of making a genuine impact on the company's future success.

We look to our people to form and deliver on our strategy, and you will have a great opportunity to take an active role in setting and working on our company goals and deliverables.

At Simul8 we love what we do and we're serious about simulation – but we don't take ourselves too seriously! We have nurtured a genuine collaborative team and like to balance our hard work with time to unplug, have fun and make time for ourselves. We do everything we can to make work a pleasure, such as providing a budget for your home office set up, a city centre hub for collaborating, regular social events and opportunities to develop your career and learn new skills.

Other benefits include

- Competitive salary and bonus/commission schemes.
- Flexible working policy, providing an autonomous work environment and work/life balance that suits individual needs.
- Financial benefits: generous pension scheme and life insurance.
- 31 days holiday a year – increasing over time with the option to buy more .
- Ability to work up to 60 days abroad in one year.
- Tax-free work from home allowance including funds to set up your home office to your liking.
- Health & wellbeing initiatives such as Wednesday yoga.
- Dedicated Social Team for planning monthly activities for the whole company, from dinner and drinks to game nights.
